Despite Denmark's manifest virtues, Danes never talk about how proud they are to be Danes. This would sound weird in Danish. When Danes talk to foreigners about Denmark, they are modest, self-indulgent of their countrymen and the high taxes. No Dane would look you in the eye and say, "Denmark is a great country." You're supposed to figure this out for yourself.

It is the land of the silk safety net, where almost half the national budget goes toward smoothing out life's inequalities, and there is plenty of money for schools, day care, and Danes love seminars: three days at a study centre hearing about waste management is almost as good as a ski trip. It is a culture bombarded by English, in advertising, pop

there is no Danish Academy to defend against it-- old dialects persist in Jutland that can barely be understood by Copenhageners. It is the land where, as the saying goes, "Few have too much and fewer have too little," and a foreigner is struck by the sweet egalitarianism that prevails, where the lowliest clerk gives you a level gaze, where Sir a --- about 55% of Danish garbage gets made into something new--- and no nuclear power plants. It's a nation of tireless planners. Trains run on time. Things operate well in general.

Such a nation of overachievers---a brochure from the Ministry of Business and Industry says, "Denmark is one of the world's cleanest and most organized countries, with virtually no pollution, crime, or poverty. Denmark is the most corruption-free society in the Northern Hemisphere." So, of course, one's heart lifts at any sighting of Danish sleaze: skinhead graffiti on buildings ("Foreigners Out of Denmark!"), brok

Nonetheless, it is an orderly land. You drive through a Danish town, it comes to an end at a stone wall, and on the other side is a field of barley, a nice clean line: town here, walkers. People stand on the curb and wait for the red light to change, even if it's 2 a.m. and there's not a car in sight. However, Danes don't think of themselves as a waitin

at 2 a.m. for the green light people--- that's how they see Swedes and Germans. Danes see themselves as jazzy people, improvisers, more free spirited than Swedes, but the truth is (though one should not say speaking, utterly honest, highly disciplined people will get your goods around to Scandinavia, the Baltic States, and Russia. Airports, seaports, highways, and rail lines are maintained.

The orderliness of the society doesn't mean that Danish lives are less messy or lonely than yours or mine, and no Dane would tell you so. You can hear plenty about bitter f

But there is a sense of entitlement and security that Danes grow up with. Certain things are yours by virtue of citizenship, and you shouldn't feel bad for taking what you're e

He emerged, all of a sudden, in 1957: the most explosive new poetic talent of the English post-war era. Poetry specialised, at that moment, in the wry chronicling of the everyday. The poetry of Yorkshire-born Ted Hughes, first published in a book called "The Hawk in the Rain" when he was 27, was unlike anything written by his immediate predecessors. Driven by an almost Jacobean rhetoric, it had a visionary fervour. Its most eye-catching characteristic was Hughes's ability to get beneath the skins of animals: foxes, otters, pigs. These animals were the real thing all right, but they were also armorial d symbols of the countryside and lifeblood of the earth in which they were rooted. It gave his work a raw, primal stink.

It was not only England that thought so either. Hughes's book was also published in America, where it won the Galbraith prize, a major literary award. But then, in 1963, Sylvia Plath imposed public silence about their relationship in a book of loose-weave poems called "Birthday Letters". In this new and exhilarating collection of real letter, Hughes return to the issue of his first wife's death, which he calls his "big and un

The analysis is raw, pained and ruthlessly self-aware. For all the moral torment, the writing itself has the same rush and vigour that possessed Hughes's early poetry. Some books of letters serve as a personalised history long notoriety. These letters are filled with his wrestling with the consequences of being the part-private, part-public creature that he became, desperate to devote himself to his writing, and yet subject to endless invasions of his privacy.

Hughes is an absorbing and intricate commentator upon his own poetry, even when he is standing back from it and good-humouredly condemning himself for "its fantasticalia, its prettifications and its infinite verbalifications". He also believed, from first to last, that poetry had a special place in the

TEXT C

Richard, King of England from 1189 to 1199, with all his characteristic virtues and faults cast in a heroic mould, is one of the most fascinating medieval figures. He has been described as the creature and embodiment of the age of chivalry. In those days the lion was much admired in heraldry, and more than one king sought to link himself with its repute. When Richard's contemporaries called him "Coeur de Lion"(The lion heart), they paid a lasting compliment to the king of beasts. Little did the English people owe him for his services, and heavily did they pay for his adventures. He was in England only twice for a few short months in his ten years' reign: yet his memory has always English hearts, and seems to present throughout the centuries the pattern of fighting man. In all deeds of prowess as well as in large schemes of war Richard shone. He was tall and delicately shaped strong in nerve and sinew, and most dexterous in arms. He rejoiced in personal combat, and regarded his opponents

without malice as necessary agents in his fame. He loved war, not so much for the sake of glory or political ends, but as other men love science or poetry, for the excitement of the struggle and the glow of victory. By this his whole temperament was toned; and united with the highest qualities of the military commander, love of war called forth all the powers of his mind and body.

Although a man of blood and violence, Richard was too impetuous to be either treacherous or habitually cruel. He was as ready to forgive as he was hasty to offend; he was open-handed and munificent to profusion; in war circumspect in design and skillful in execution; in political a child, lacking in subtlety and experience. His political alliances were formed upon his likes and dislikes; his political schemes had neither unity nor clearness of purpose. The advantages gained for him by military geoids were flung away through diplomatic ineptitude. When, on the journey to the East, Messina in sicily was won by his arms he was easily persuaded to share with his polished, faithless ally, Philip Augustus, fruits of a victory which more wisely used might have foiled the French King's artful schemes. The rich and tenable acquisition of Cyprus was cast away even more easily than it was won. His life was one magnificent parade, which ended, left only an empty plain.

In 1199, when the difficulties of raising revenue for the endless war were at their height, good news was brought to King Richard. It was said there had been dug up near the castle of Chaluz, on the lands of one of his French vassals, a treasure of wonderful quality; a group of golden images of an emporor, his wife, sons and daughters, seated round a table, also of gold, had been unearthed. The King claimed this treasure as lord paramount. The lord of Chaluz resisted the demand, and the King laid siege to his small, weak castle. On the third day, as he rode daringly, near the wall. Confident in his hard-trying luck, a bolt from a crossbow struck him in the left shoulder by the neck. The wound, already deep, was aggravated by the necessary cutting out of the arrow-head. Gangrene set in, and Coeur de Lion knew that he must pay a soldier's debt. He prepared for death with fortitude and calm, and in accordance with the principles he had followed. He arranged his affairs; he divided to be his heir, and made all present swear fealty to him. He ordered the archer who had shot the fatal bolt, and who was now a prisoner, to be brought before him. He pardoned him, and made him a gift of money. For seven years he had not confessed for fear of being compelled to be reconciled to Philip, but now he received the offices of the Church with sincere and exemplary piety, and died in the forty-second year of his age on April 6, 1199, worthy, by the consent of all men, to sit with King Arthur and Roland and other heroes of martil romance at some Eternal round Table, which we trust the Creator of the Universe in His comprehension will not have forgotten to provide.

The archer was flayed alive.

- A. received little protection from him
- B. paid few taxes to him

42 To say that his life was a "magnificent parade" (Paragraph Two) implies that to some extent it was ____.

- A. an empty show
- B. lived too pompously
- C. impressive and admirable
- D. spent chiefly at war

43 Richard's behavior as death approached showed ____.

- A. bravery and self control
- B. wisdom and correctness
- C. Devotion and romance
- D. chivalry and charity

44 The point of the last short paragraph is that Richard was ____.

- A. cheated by his own successors
- B. determined to take revenge on his enemies
- C. more generous to his enemies than his successors
- D. unable to influence the behavior of his successors

Examinations Exert a Pernicious Influence on Education

We might marvel at the progress made in every field of study, but the methods of testing a person's knowledge and ability remain as primitive as ever they were. It really is extraordinary that after all these years, educationists have still failed to devise anything more efficient and reliable than examinations. For all the pious claim that examinations test what you know, it is common knowledge that they more often do the exact opposite. They may be a good means of testing memory, or the knack of working rapidly under extreme pressure, but they can tell you nothing about a person's true ability and aptitude.

As anxiety-makers, examinations are second to none. That is because so much depends on them. They are the mark of success or failure in our society. Your whole future may be decided in one fateful day. It doesn't matter that you weren't feeling very well, or that your mother died. Little things like that don't count: the exam goes on. No one can give of his best when he is in mortal terrow, or after a slpless night, yet this is precisely what the examination system expects him to do. The moment a child begins school, he enters a world of vicious competition where success and failure are clearly defined and measured. Can we wonder at the increasing number of 'drop-outs': young people who are written off as utter failures before they have even embarked on a career? Can we be surprised at the suicide rate among students?

A good education should, among other things, train you to think for yourself. The examination system does anything but that. What has to be learnt is rigidly laid down by a syllabus, so the student is encouraged to memorize. Examinations do not motivate a student to read widely, but to restrict his reading; they do not enable him to seek more and more knowledge, but induce cramming. They lower the standards of teaching, for they deprive the teacher of all freedoms. Teachers themselves are often judged by examination results and instead of teaching their subjects, they are reduced to training their students in exam techniques which they despise. The most successful candidates are not always the best educated; they are the best trained in the technique of working under duress.

The results on which so much depends are often nothing more than a subjective assessment by some anonymous examiner. Examiners are only human. They get tired and hungry; they make mistakes. Yet they have to mark stacks of hastily crawled scripts in a limited aount of time. They work under the same sort of pressure as the candidates. And their word carries weight. After a judge's decision you have the right of appeal. but not after an examiner's. There must surely be many simpler and more effective ways of assessing a person's true abilities. Is it cynical to suggest that examinations are merely a profitable business for the institutions that run them? This is what it boils down to in the last analysis. The best comment on the system is this illiterate message recently scrawled on a wall: 'I were a teenage drop-out and now I are a teenage millionaire.'

46 The main idea of this passage is ____.

- A. examinations exert a pernicious influence on education

- B、examinations are ineffective
 C、examinations are profitable for institutions

- 52 请把下段文字翻译成汉语:

If people mean anything at all by the expression "untimely death", they must believe that some deaths run on a better schedule than others. Death in old age is rarely called untimely—a long life is thought to be full one. But with the passing of a young person, one assumes that the best years lay ahead and the measure of that life was still to be taken. History denies this, of course. Among prominent summer deaths, one recalls those of Marilyn Monroe and Jame Deans, whose lives seemed equally brief and complete.

- 52 提及“英年早逝”, 如果人们确有所指的话, 他们必定相信, 一些人的辞世可以算寿终正寝, 另一些则不然。死于年迈很少被冠以“死不逢时”之名, 因为能度过漫长的一生被认为是圆满的。反之, 如果青年过世, 人们则认为他的锦绣年华尚未展其时, 天寿应为几何, 不可预料。

然而, 历史对此难以苟同。论起英年早逝, 人们自然会忆起玛丽莲·梦露, 詹姆斯·迪恩, 他们的生命虽然短暂, 却完整圆满。诗人约翰·济慈26岁溘然长逝, 令文人墨客唏嘘不已。倘若年至26岁时尚无建树, 他们难免会戏谑自己荒废人生。认为英年早逝是不圆满的这种观点有悖于逻辑, 这是因为生命的价值取决于它留给世界的印象、它的力度以及其自身的美德。
